DOMAIN PROBLEM IN OUR WORDS

GENESIS

Explain the problem in your domain simply, in your own words

- In an emergency, we usually go to the nearest hospital, but that hospital may not have the right treatment or enough space. We want to find a way to quickly choose the best hospital for the patient.
- During an emergency, even a small delay can matter. If the hospital is overcrowded or doesn't have the required treatment, more time can be lost. Our idea can help patients reach the right hospital faster.

TEAM
Your Team Name

WHO IS AFFECTED?

GENESIS

Target users, stakeholders, beneficiaries

- Emergency patients and their families.
- Ambulance drivers and hospitals.
- Emergency patients and their families can reach suitable hospitals faster, while hospitals can manage patients based on their available facilities and capacity.

TEAM
Your Team Name

CURRENT SITUATION & CONTEXT

GENESIS

Existing scenario, background and how things work today

- People usually go to the nearest hospital during emergencies, but it may not have the required treatment.
- Every hospital has different facilities and capacity.
- Emergency occurs → Search nearby hospital → Travel there → Find out if treatment is available.

TEAM
Your Team Name

KEY CHALLENGES

Main difficulties, bottlenecks, root causes and consequences

- Finding the right hospital quickly. Knowing treatment facilities and availability.
- Hospital information may be outdated or difficult to find.
- Patients may lose valuable time and need to travel to another hospital.

EXISTING SOLUTIONS / APPROACHES

What is already being done, and where it falls short

- Google Maps and hospital finder apps help locate nearby hospitals.
- They may not show the required treatment facilities or current availability.
- We need a system that finds the most suitable hospital, not just the nearest one.

TEAM
Your Team Name

PROBLEM INSIGHTS & OPPORTUNITY AREAS

GENESIS

Resources required to solve the problem

- Smartphone or computer.
- Hospital database, maps and a matching algorithm.
- Updated hospital information and support from hospital staff.

TEAM
Your Team Name

INITIAL DIRECTION & EXPECTED OUTCOME

GENESIS

What Is Your Expected Outcome?

- Develop a system to match patients with suitable hospitals.
- Reduce the time spent searching for the right hospital.
- Help patients find hospitals with the required facilities and availability faster.
